

Certified Apigee Corporate Training Partner

Creating adaptive learning solutions to empower individuals to pursue the work they love on the most relevant skills of the 21st century .

The goal of the academy is to prepare both individuals and organizations with their Digital transformation and innovation pursuits. The 360 Technology instruction and learning models will focus on multidisciplinary thinking and problem-solving techniques through blending of science (stats and math) and software engineering disciplines to assist students with developing data products.

VISION: Realize innovation agility through science.

MISSION: Help people learn pragmatically to exploit science and technology for career pursuits.

Delivering a Comprehensive, Customized and Specialized Apigee Training Program to a World Leading Technology Company

Business leaders increasingly understand the potential of APIs but still too few understand the need for API management. An yet API management is a necessity in today's digital economy. APIs expose data for use by apps and the developers that create them. They make enterprise assets reachable by apps, and they're the tool that enterprises use to add a digital layer to their interactions with customers, employees, and partners. Apigee a leader in full lifecycle API management platform that enables API providers to design, secure, deploy, monitor, and scale APIs. Apigee sits in-line with runtime API traffic and enforces a set of out-of-the-box API policies, including key validation, quota management, transformation, authorization, and access control. API providers use the customizable developer portal to enable developers to consume APIs easily and securely, and to measure API performance and usage.

Day 1

- * Recap: Java basic and another object-oriented language, understanding of data formats such as XML, CSV, and JSON, understanding of typical integration technologies such as HTTP, JMS, JDBC, REST, and SOAP
- * Understanding API manager use case & challenges and introduction open API.
- * Apigee Platform Overview
- * Best practices in RESTful API Design Key API Concepts, Anatomy of a Proxy Connectivity and Basic security
- * API Management and API Key Validation, Protection against Content-based Attacks Authentication, Authorization and Identity
- * Lab

Day 2

- * Traffic Management, Other Security Considerations Lab, Protocol Conversions Caching and Custom Analytics
- * API Baas, Environments, Security Data Storage and Custom Analytics
- * Using Java in Apigee Edge, API Facades, Content Validation, Mashups and Scripting
- * Lab

Day 3

- * Hands-On Project.

ABOUT 360 Technology

360 Technology delivers digital transformation and technology services from ideation to execution, enabling Global clients to outperform the competition. "Born digital," 360 Technology takes an agile, collaborative approach to creating customized solutions across the digital value chain. Our deep expertise in Cloud, Microservice Transformation, IOT and applications management turns IT into a strategic asset. Whether you need to run your business more efficiently or accelerate revenue growth, 360 Technology can get you there.
