Why 360 Technology for Custom Dashboards?

90% of businesses believe data and analytics are critical to their digital transformation initiatives, and they are not mistaken.

Custom dashboards from 360 Technology provide aggregate data that contributes to your company's overall success.

We tailor them to the most important metrics for your company, which means you'll only see the performance indicators that are relevant to you.

We include features such as **pie charts, graphs, and interactive maps.**

When up and running, your dashboard will function as your **virtual assistant, eliminating time-consuming tasks and focusing solely on increasing your ROI.**

Our Key Custom Dashboard Development Features

Our essential custom dashboard development features at 360 Technology include IT dashboards and other dashboards to provide you with detailed insights and reports for your business activities and growth projection.

Here are the key features provided by 360 Technology.

Key Performing Index Dashboard

It aids in gaining the best insights into your company's activities that are performing well.
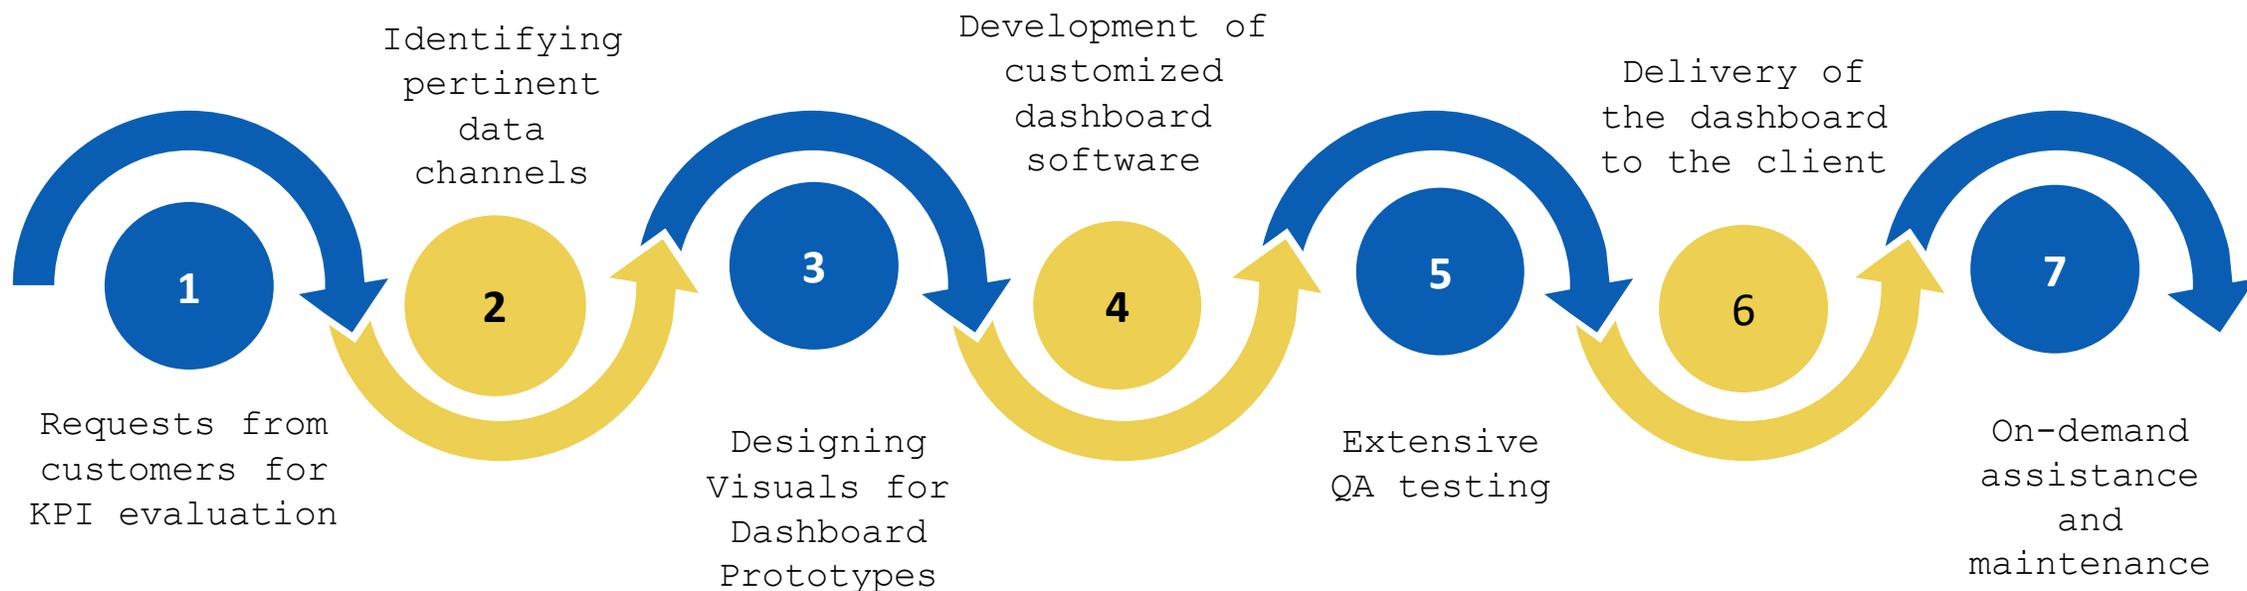

Marketing Dashboard

It keeps track of marketing activities in order to provide you with the most accurate information about money spent and related entities such as return on investment, etc.

Sales Dashboard

The sales dashboard provides information about your company's sales. It provides you with a detailed analysis and overview of the subject in a very interactive manner.

Operations Dashboard

It aids in a better understanding of business operations in terms of logistics and other business operational activities.
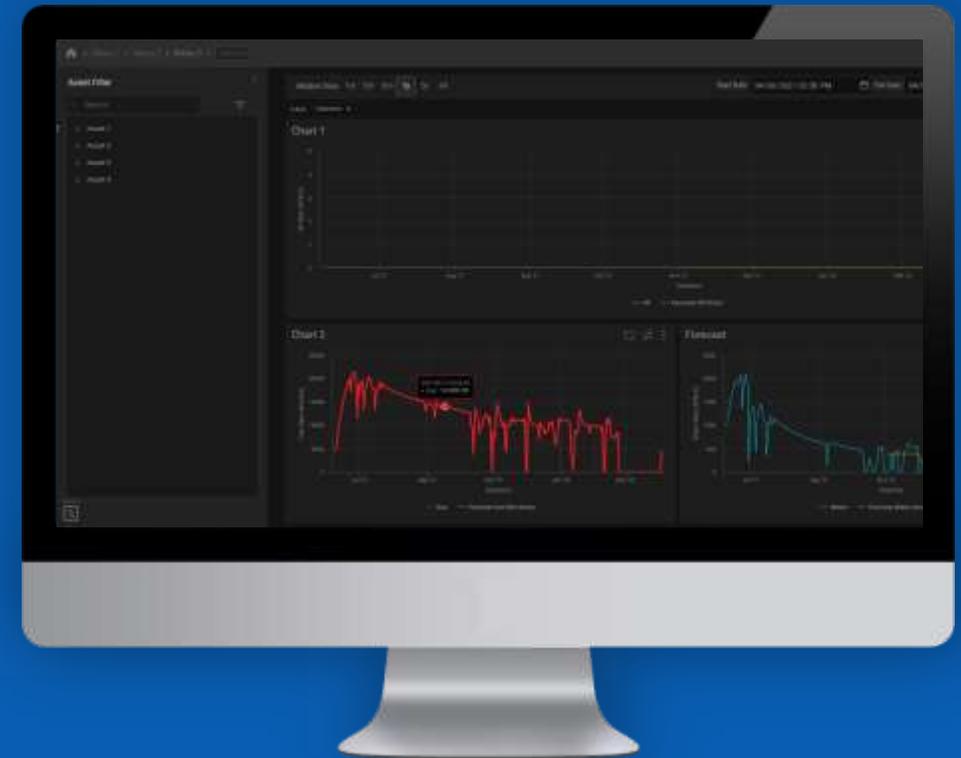

IT dashboard

It provides you with overall insights into your IT-related activities that may be impacting your business.

Our Dashboard Development Process

Identifying pertinent data channels

Development of customized dashboard software

Featured Projects

We have assisted several clients in implementing their business requirements by utilizing third-party SOAP or REST API.

We are experts in creating upper management dashboards using a variety of data sources such as databases running various DBMS, API, Excel, and legacy systems.

Oil & Gas Dashboard

The Oil and Gas dashboard solution from 360 Technology follows industry best practices and is built on a flexible and scalable architecture. The solution has been shown to significantly reduce implementation costs and timelines, as well as reduce risks.

Our oil and gas dashboards are made up of predefined views and data integration capabilities that can be deployed on any platform to give real-time visibility into operations and actionable insights across the value chain.
